

BRODIE HARPER **Postcards presenter**

Born and raised on Victoria's Mornington Peninsula, Brodie Harper began as a presenter on Victoria's popular travel program, Postcards, in early 2007.

Since joining Channel Nine Melbourne's home-grown series, she has travelled to every corner of Victoria from Walhalla to the Great Ocean Road and beyond. Always keen for a challenge, Brodie cites an adrenaline pumping tear around Phillip Island race track as a highlight.

Brodie's stunning looks quickly got her noticed by one of Melbourne's most prestigious modelling agencies when she was discovered at a local shopping centre with a friend at age 19.

From there her career took off locally and internationally with one of her favourite modelling assignments being a commercial shot in New Zealand which enabled her to explore that country's spectacular outdoors. When approached by the producers of Postcards to try out for the local travel show, she jumped at the opportunity to spend time seeing and sampling Victoria.

In 2008, Brodie's charitable side was witnessed by the nation when she donned a silver spandex suit for Nine's new hit program Hole in the Wall which resulted in a peak audience of 1.7 million viewers watching her contort her body and be slammed by the wall all in the name of charity.

Brodie's profile rose even further when she became the 2008 Moonee Valley Spring Racing Fashion Ambassador.

In December 2009, Brodie took on the role of Nine News weather presenter when Livinia Nixon took maternity leave. Brodie continues to be a regular fill-in Nine News weather presenter when Livinia is on-leave.

Away from TV, Brodie spends time with her husband Heath Meldrum, friends and family and indulges herself at Victoria's beaches and wineries. Brodie says design and decorating is her secret love. Most weekends you will find Heath, Brodie and their surfing dog Jack out on the surf enjoying the beaches and waves.

Recently, Brodie took part in the The 2011 Formula 1™ Qantas Australian Grand Prix Lexus Celebrity Challenge.
